

INTERNSHIP REPORT

Teaching Support & Digital Literacy in Government Primary School

Aipta Ghosh

B.Tech CSE IBM | 2CSE-22 | Roll No. 25SCS1003000686 | Batch 2025–29
School of Computer Science and Engineering, IILM University, Greater Noida

Organisation – Mahila Sewa Shakti Foundation Noida

Presentation Overview

A concise journey from the school context to outcomes and reflection

2

- Internship context & organization profile
- Problem statement and key learning challenges
- Objectives and project scope
- Teaching activities & digital literacy support
- Tools, educational model and methodology
- Outcomes, personal learning and conclusion

Focus

Academic support + digital awareness

Approach

Student-centric & activity-based

Impact

Participation, confidence & skills

Internship Context

3

Bridging academic learning with real-world community engagement

Why an internship?

An internship connects academic theory with practical application while developing professional competencies, problem-solving and collaboration.

Placement setting

Government primary-school environment with direct interaction with primary-grade learners and teaching staff.

Core role

Observe teaching, assist faculty, mentor students and support foundational academics and digital literacy.

- Classroom observation and student interaction
- Academic assistance in foundational subjects
- Interactive activities and practical exercises
- Basic awareness of computers and technology
- Understanding school administration and classroom management

Organization Profile

Government primary school serving the local community

4

- Located in Noida, Uttar Pradesh
- Focused on accessible and affordable elementary education
- Core curriculum includes Hindi, English, Mathematics, Environmental Studies and general knowledge
- Dedicated teaching staff and basic instructional resources
- Serves learners from diverse socioeconomic backgrounds
- Acts as a community hub supporting literacy, educational equity and life skills

Learning Environment

Structured lessons + classroom discipline

Learner Support

Addressing individual learning gaps

Community Role

Literacy, equity & life skills

Problem Statement

5

Key learning barriers observed or considered during the internship

Different learning levels

Students in the same class progress at different paces.

Foundational gaps

Reading comprehension and basic mathematical operations can be challenging.

Digital exposure

Limited access or exposure to computers and digital learning resources.

Confidence & participation

Some students hesitate to ask questions or participate.

Attention & engagement

Traditional activities may not sustain concentration for every learner.

Need

More activity-based, visual and student-centric learning.

Project Objectives

6

What the internship aimed to achieve

- Understand the functioning of a government primary school
- Observe classroom teaching and student-learning patterns
- Provide academic assistance to primary-school students
- Improve basic reading, writing and mathematical skills
- Encourage interactive learning and participation
- Introduce awareness of computers and digital technology
- Promote cleanliness, discipline, teamwork and communication
- Develop teaching, leadership, patience and communication skills
- Understand social and educational challenges faced by young learners
- Contribute positively to the school learning environment

Scope of the Internship

7

Academic assistance, digital awareness, interaction and co-curricular participation

Academic Support

- Hindi reading & writing
- English alphabet, vocabulary & sentences
- Addition, subtraction, multiplication & division
- General awareness & EVS
- Homework and revision

Digital Awareness

- Computers and their uses
- Main computer parts
- Keyboard and mouse
- Educational videos
- Safe and responsible technology use

Co-Curricular Activities

- Drawing & colouring
- Storytelling
- Group discussions
- Quizzes
- Recitation & reading
- Number/word games
- Hygiene awareness

Key Activities Conducted

8

Learning was designed to be simple, interactive and age-appropriate

Reading & Language

Reading practice, vocabulary, sentence formation and recitation

Mathematics

Basic operations, worksheets and number-based games

Digital Literacy

Computer awareness, parts of a computer, keyboard/mouse and educational content

Creative Learning

Drawing, colouring and storytelling to encourage expression

Collaborative Learning

Group discussions, quizzes and teamwork activities

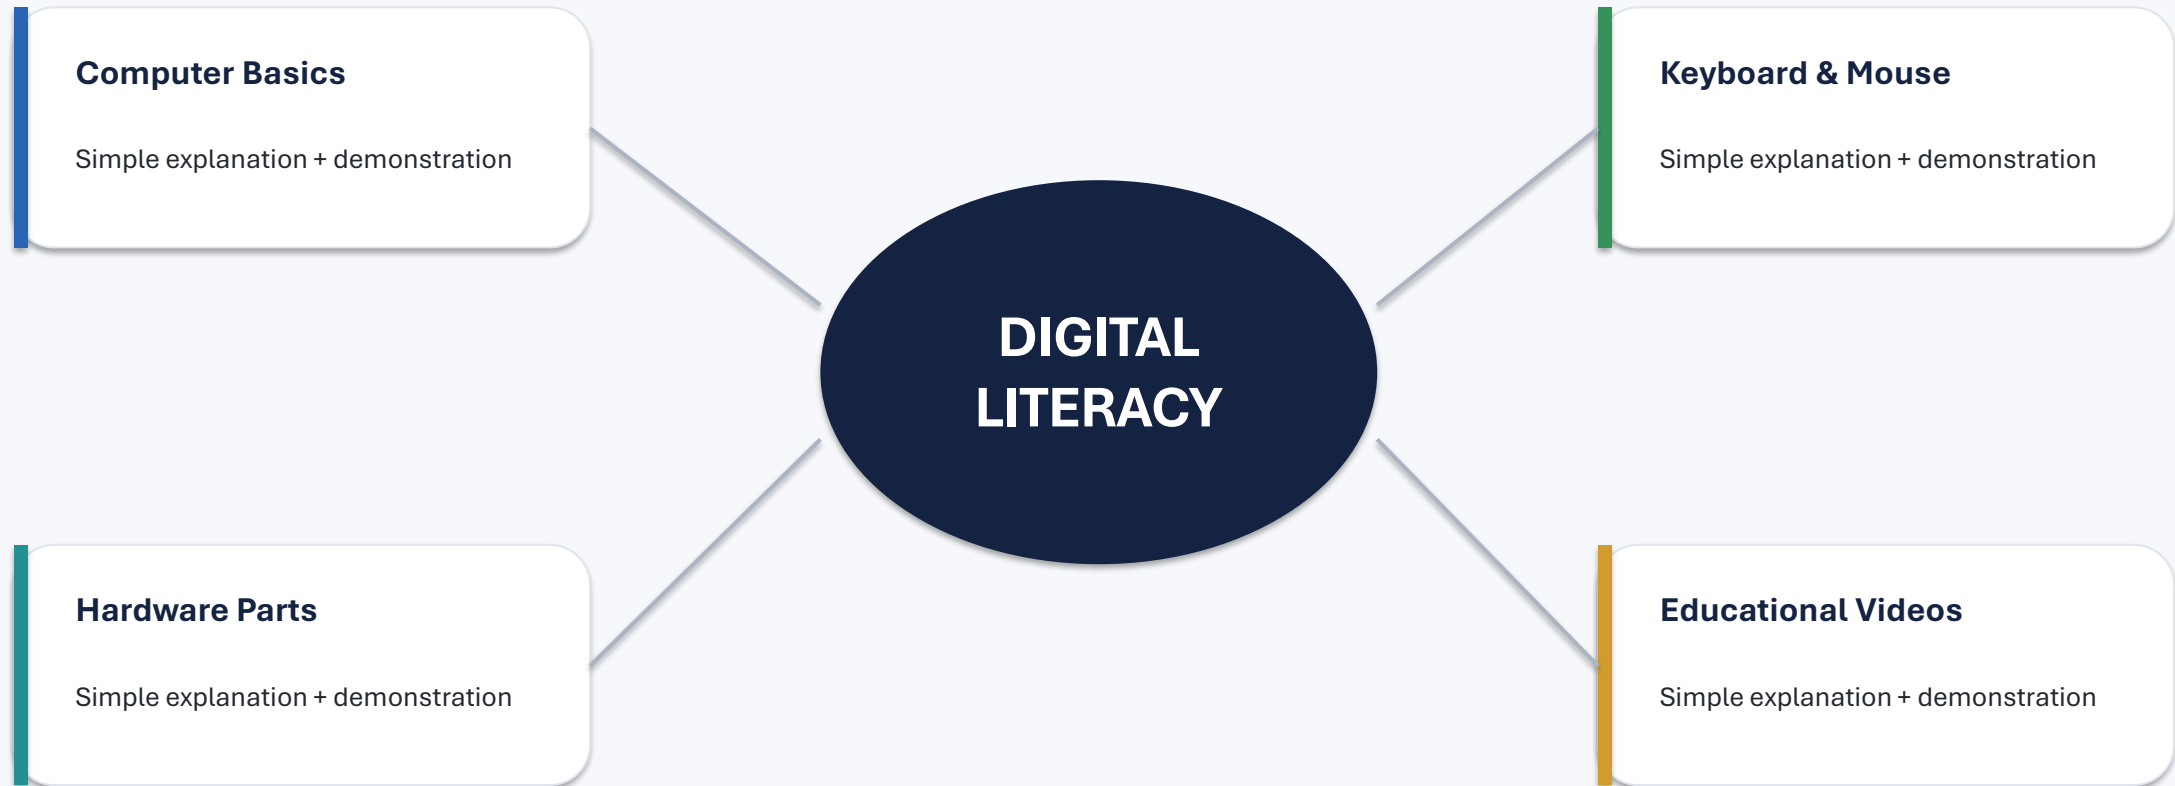

Life Skills

Cleanliness, hygiene, discipline and communication awareness

Digital Literacy Component

Introducing technology through foundational, practical concepts

9

Technologies & Teaching Resources

10

Tools were selected according to student age and resources available

Computer / Laptop

Demonstrate basic computer concepts

Educational Videos

Make lessons more interactive

Word / Google Docs

Prepare worksheets and report material

Blackboard / Whiteboard

Explain academic concepts

Worksheets

Practice reading, writing and mathematics

Projector / Display

Show educational content where available

PowerPoint / Presentations

Explain topics visually

Internet Resources

Collect educational material

Charts / Flashcards

Support visual learning

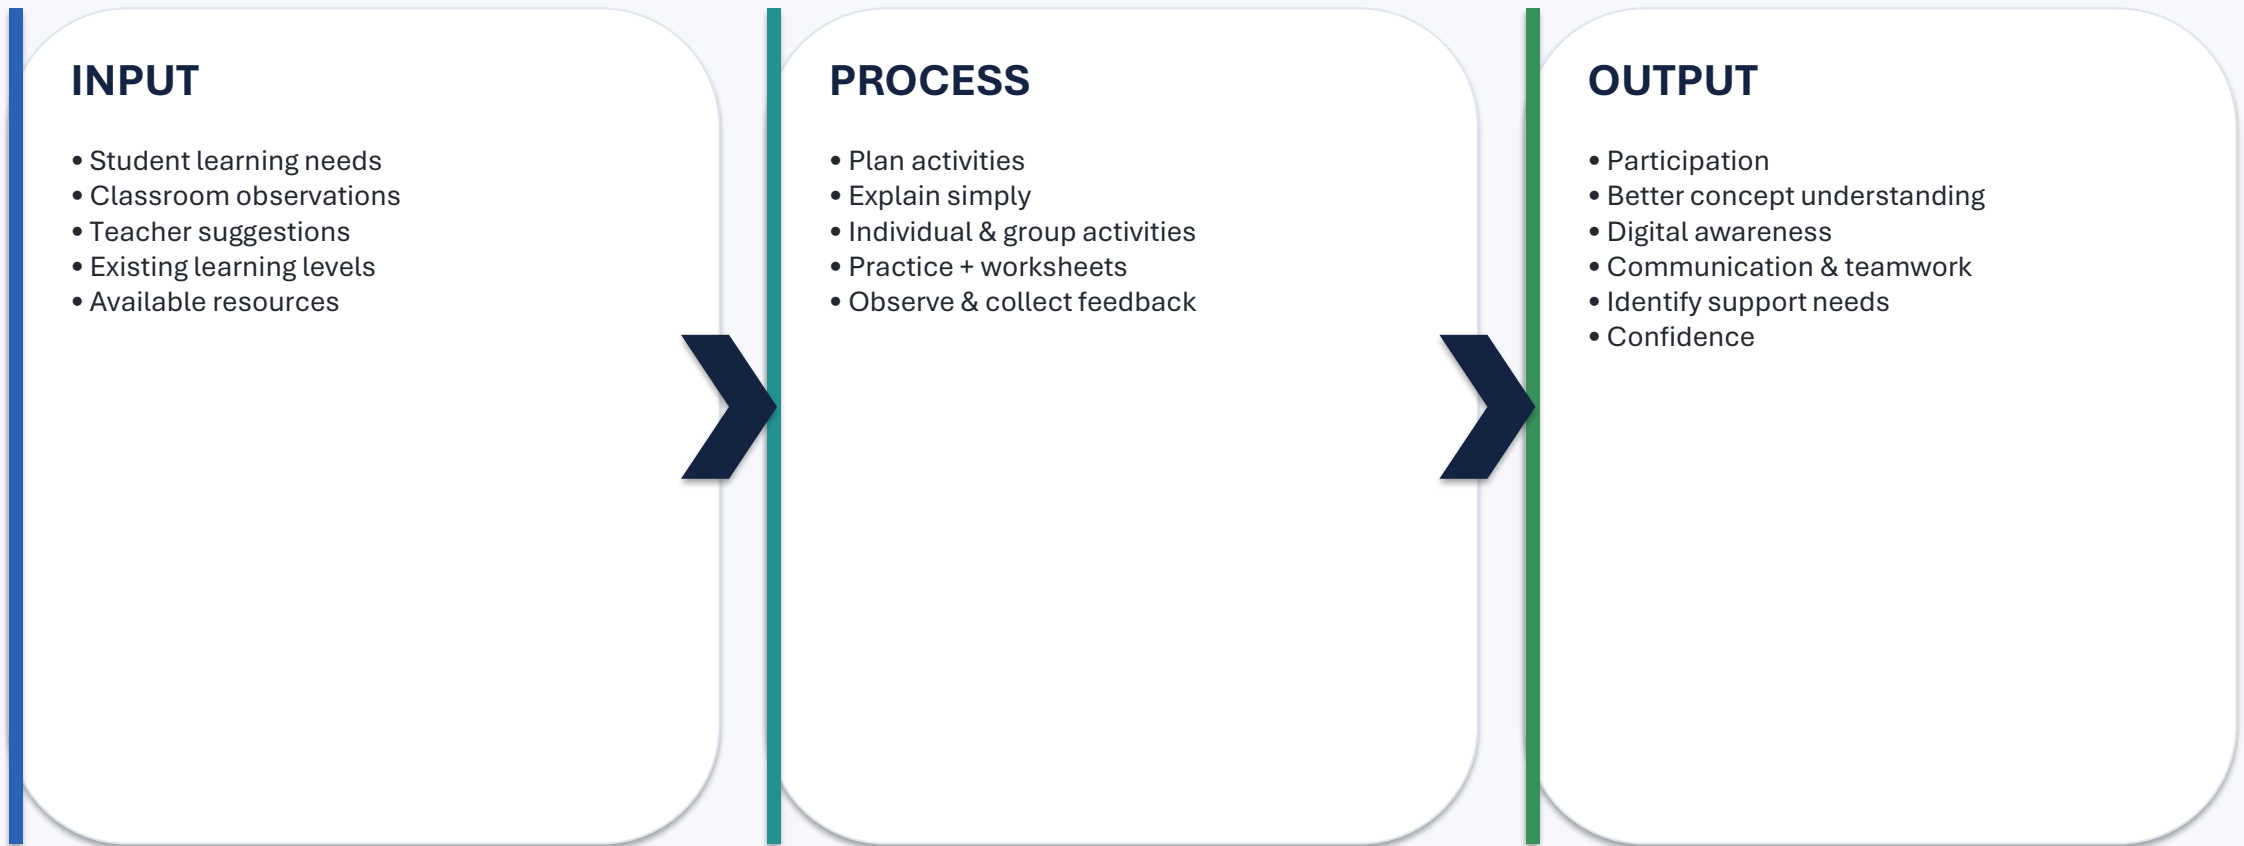

Drawing Materials

Encourage creativity and participation

Educational Activity & Feedback Model

11

A process model rather than a software architecture

Student Needs → Activity Planning → Classroom Interaction → Practice & Assessment → Feedback → Improvement

Methodology

Eight phases followed during the internship

12

1

Orientation

Understand school, staff, students, timetable and rules

2

Observation

Observe teaching, behaviour, participation and classroom management

3

Student Interaction

Understand interests, difficulties, preferences and confidence

4

Activity Planning

Design simple, engaging and age-appropriate activities

5

Academic Assistance

Support reading, writing, vocabulary, maths, homework and revision

6

Digital Awareness

Explain computer concepts and role of technology in education

7

Evaluation

Use questions, worksheets, group work and classroom interaction

8

Reflection

Collect feedback and reflect on effectiveness, challenges and skills

Evaluation & Feedback

13

Informal assessment focused on participation and understanding

Questions

Check understanding through simple questions and classroom interaction.

Worksheets

Use practice exercises to reinforce reading, writing and mathematics.

Group Activities

Observe participation, communication and teamwork during activities.

Teacher Feedback

Reflect on activity effectiveness and student response.

Student Feedback

Use learner reactions and participation to refine activities.

Expected Outcomes

Academic, behavioural and digital-learning outcomes

14

- Greater interest in classroom activities
- Additional support in foundational academic subjects
- Improved confidence in answering questions
- Greater familiarity with computers and digital technology
- Stronger teamwork and communication
- Awareness of cleanliness and personal hygiene
- Assistance to teachers in selected learning activities
- Identification of learning gaps requiring additional support

Learner Impact

Engagement • Confidence • Understanding

Teacher Support

Assistance with selected learning activities

Community Value

Inclusive education & digital awareness

Personal Learning Outcomes

Skills developed through direct interaction and responsibility

15

Effective communication with children

Developed through practical classroom experience

Leadership & teamwork

Developed through practical classroom experience

Problem-solving

Developed through practical classroom experience

Patience & empathy

Developed through practical classroom experience

Adaptability

Developed through practical classroom experience

Classroom coordination & management

Developed through practical classroom experience

Time management

Developed through practical classroom experience

Planning & organisation

Developed through practical classroom experience

Public speaking & presentation

Developed through practical classroom experience

Social responsibility

Developed through practical classroom experience

Limitations & Challenges

Constraints considered while interpreting the internship experience

16

- Internship duration was limited.
- Students had different academic abilities and learning paces.
- Availability of computers and digital devices could be limited.
- Activities had to be adjusted according to the school timetable.
- Assessment of improvement was primarily based on observation and classroom participation.

Response

Adapt activities to learner needs

Priority

Keep learning simple & engaging

Assessment

Use participation + informal feedback

Key Reflection

17

What the internship demonstrated beyond the classroom

“Teaching young children requires clarity, creativity, patience, and continuous encouragement.”

Lesson 01

Simple, learner-centred activities can create positive impact.

Lesson 02

Technology becomes meaningful when introduced practically and responsibly.

Lesson 03

Community engagement strengthens both professional and social skills.

Conclusion

21

A practical learning experience combining education, technology and social responsibility

For Students

Provided academic support, interactive learning and foundational digital awareness.

For the School

Supported selected classroom activities and encouraged participation.

For Me

Built communication, patience, leadership, planning and social responsibility.

Final Takeaway

Small, well-designed learning interventions can contribute to confidence, engagement and inclusive education.

THANK YOU

Teaching Support & Digital Literacy in Government Primary School
